IMPORTANT SAFETY INSTRUCTIONS.

PLEASE READ AND SAVE THESE INSTRUCTIONS BEFORE SETUP AND USE.

KEEP THESE INSTRUCTIONS IN A SAFE PLACE FOR FUTURE REFERENCE.

FOR AGES 5-12

ADULT SET UP IS REQUIRED.
Part List

1. Shark Bite Water Slide™ x 1

2. Water Divider x 1

3. Water Tubes x 2

4. Ground Stakes x 2

5. Repair Patch x 1
Safety Information

WARNING!

To avoid the risk of serious injury or death:

• Setup should be done from a safe distance away from fences, garages, houses, overhanging branches, laundry lines or overhanging electrical wires.

• Do not setup or use on concrete, asphalt or any other hard surfaces.

• Because of their larger size, older children and adults risk spine, neck, head or other life-threatening injuries from using this slide.

• Reckless use, misuse or abuse of this slide may cause serious, even fatal, injury.

• Disregard and not following the instructions from manual and warnings could result in injury or death, especially for children.

• DO NOT ALLOW ANYONE TO USE THIS PRODUCT WHO IS UNDER THE AGE OF 5 or OVER THE AGE OF 12 WHO WEIGHS OVER 110 lbs (50kg).

While every attempt is made to embody the highest degree of protection in all equipment, we cannot guarantee freedom from injury. The user assumes all risk of injury resulting from use. All merchandise is sold on this condition, which no representative of the company can waive or change.

IMPORTANT WATER PRESSURE AND OPERATING INFORMATION

After connecting the hose connector to garden hose, TURN ON WATER SLOWLY and adjust the water pressure accordingly.

Water pressure can vary dramatically between cities. Please read the following for answers to common questions.

Areas of LOW WATER PRESSURE

• For maximum performance, it is recommended to use a 5/8 in (1.6cm) diameter garden hose.

• The stream of water should from an arch and splash onto the slide. If not, then this is usually due to low pressure.

• Make sure the water is turned on all the way. As long as the slide is getting wet, it will be fun to use.

• Long hoses reduce water pressure: The longer the hose, the farther the water travels from the faucet thus reducing water pressure. In areas of low water pressure, this could affect performance of the water slide. Try using a shorter hose if you have one.

Areas of HIGH WATER PRESSURE

• If water shoots over the slide, adjust the faucet to lower the water pressure. It is important that the water lands on the slide to keep it wet and slick.

Maintenance of Slide

1. Check the slide at regular intervals for holes, tears or other damage. DO NOT use a damaged slide. Use of a damaged slide could result in serious injury or death.

2. In addition to checking the product at regular intervals, be sure to complete a thorough check of the entire product at the beginning of each season or series of use.

3. If any components of the product are damaged or have deteriorated, discontinue use and contact the manufacturer.

4. Regularly check the condition of the ground stakes that hold the slide in place. Damage to or deterioration of the stakes could result in the slide becoming unstable, which could result in serious injury.

5. Check the water bags at regular intervals for any signs of damage or deterioration. Damaged or deteriorated water bag could cause the slide to become unstable, which would be a significant safety hazard.
For your convenience, a repair patch has been included to repair holes in the inflatable section.

Do not use the patch for holes or rips on the seam.

In the event of an accidental puncture, cut out a suitably sized patch. Make sure you round the corners of your repair patch to avoid peeling. Make sure the area to be patched is clean and dry. Press patch firmly over the puncture.

Do not inflate for 20 minutes.
Setup Instructions

Placement diagram:

1. Use on flat lawn only, not on pavement or other hard surfaces. Lawn should be free of rocks, bumps, depressions, sticks, etc. This product should be setup in a location that has a minimum distance of 10 ft (305 cm) away from any freestanding structures or obstructions including: houses, garages, fences, trees, playground equipment and large rocks.

2. Roll out this product. Inspect for holes, tears or other damage.

3. Flip over the corner with the water plug. Open the plug and fill with water.

**NOTE:** When filling the water bags, do not insert the hose into the water valve completely. Doing so may cause the water bags to burst. Use a container to gently pour water into the water bags. When full, close the valve.

4. Inflate the product with AIR.

**NOTE:** For easy inflation use a manual air pump designed specifically for plastic inflatables.
5. **BY MOUTH:** Remove the air valve plug and squeeze the base of the valve causing the inner flap to open for inflation.

**BY PUMP:** Remove the air valve plug and insert air pump nozzle into the valve. The air pump nozzle should be inserted deep enough to open the inner valve flap.

Do not over inflate the item. Once the item is completely inflated, then insert the air valve plug to seal it shut.

**NOTE:** Fill inflatable with air until it is firm and solid. If there is any straining at the seams, the item is over inflated. If any seam begins to strain, immediately stop inflation and release air to reduce the pressure until all signs of stress on the inflatable are gone. DO NOT use the inflatable if there is straining at the seams. Use of an over-inflated item may result in serious injury, paralysis or death.

Inspect this product for rips, tears or punctures. Do not use if damaged.

Wet the entire slide before connecting the hose to the slide.
Setup Instructions

6. Insert one plastic stake into the hole at each corner of the slide and push it firmly into the ground using both hands.

Guide stake into ground equally with both hands until level with ground. Repeat at opposite corner. Check stakes frequently to insure they remain level with the ground.

7. Attach the two water tubes to the water divider. Then connect the ends of two water tubes to the water slide and the shark arch. Tighten until it cannot turn any further.

**NOTE:** Ensure kinks are removed from water tubes.

8. Attach the end of standard garden hose to the water divider. Turn the connector to tighten, tighten until it cannot turn any further.

9. Turn on the hose. The water flow will alternate back and forth between the slide spray rail and the shark head sprinkler, causing the shark’s mouth to open and close.
Use Instructions

How to play

1. To Slide: Run & jump low to the ground from a crouching position. Land on your stomach, keeping your arms stretched out in front of you. KEEP YOUR HEAD UP!

2. Try to slide through the shark's mouth and into the splash pool without getting bit.

3. When you are finished sliding, scoot off the slide and stand up on the grass. Walk back to the beginning of the slide and start again.

WARNING! Never stand, walk or run on the slide as you may slip and injure yourself.
NOTE:

1. Competent adult setup and supervision is required at all times. Responsible adults should instruct children on the proper use of this product.

2. Remove all hard or sharp objects such as toys, buckles, keys, jewelry, watches, etc. from person and pockets.

3. ALWAYS slide on stomach, facing forward with arms extended in front of you. NEVER slide on your knees, head or while standing. NEVER dive head first.

4. No diving.

5. Only one child should be on the sliding lane surface at a time.

6. For long periods of play, move slide occasionally to prevent causing depressions in ground underneath.

7. Check stakes occasionally to make sure they stay secure and flat on the ground.
After Use and Storage

1. Disconnect garden hose from the water divider.

2. Remove the stakes from the ground by pulling on the head of the stake. Do not pull on the product’s corner.

3. Drain this product and let it dry.

4. PUTTING YOUR PRODUCT AWAY: Make sure the product and its accessories are free of dirt, leaves, sand, etc., before deflating.

5. When this product is completely dry, carefully roll it up and store in a secure location away from children, to prevent suffocation. Do not store it indoors or in a closed container until it is completely dry. The water slide should be rolled for storage to avoid creasing. Do not fold!
